

AQUA DUST™

WATER-EMULSIFIED DUST MOP CONDITIONER

Available Packaging

DIRECTIONS FOR USE

Treatment

Dust mops or cloths may be treated by several methods:

Method 1: Spray evenly over the the mop surface with a spray bottle. Fluff the strands of the mop, and spray again. Periodic single sprayings of the mop will revitalize the dust pick-up ability.

If the mop glazes or becomes too dirty, it should be laundered.

Method 2: In a container large enough to hold mops or cloths, mix **Aqua Dust** 43 fl. oz./gallon water (333 ml/l), (1:3) and totally immerse articles until thoroughly wetted. Wring out excess and allow to dry for 24 hours before use.

Laundering

When the mops or cloths become soiled, they should be placed in an “open net” laundry bag or wrapped and tied in single layer of cheese-cloth and simply washed through a household or commercial washer. Under normal conditions, the self-laundering action of **Aqua Dust** will require no additional laundry detergent.

The Aqua Dust Difference

Buckeye **Aqua Dust**, the ready-to-use dust mop conditioner, makes dust mopping more efficient without leaving an oily film or residue behind.

Formulated specifically for the conditioning of dust mops and cloths, **Aqua Dust** attracts and holds dust particles for thorough removal.

Aqua Dust contains special emulsifiers that act as an internal laundering system to allow soiled mops and cloths to be machine-washed, saving time and money. Treated mops may be machine-washed with or without the addition of laundry detergent.

Aqua Dust may be used on all types of flooring, furniture, Formica®, metal and painted surfaces, virtually anywhere dust control is desirable.

FEATURES:

- Water-Emulsified
- Non-Flammable
- Economical
- Pleasant Fragrance
- Non-Filming
- Makes Laundering Mops and Cloths Easy
- Ready-To-Use
- Convenient Packaging
